

Petpooja API Reference

Complete credentials, endpoints, and outlet mappings for the Orders, Purchase, and Inventory Transfer APIs. Ready-to-use curl examples for any integration.

Last updated: August 2026 · 18 outlets · 3 APIs

CONTENTS

- 1. Credential Sets
- 2. Orders API
- 3. Purchase API
- 4. Inventory Transfer API
- 5. Pagination & Date Windows
- 6. Integration Notes

Credential Sets

Two separate Petpooja accounts — use the correct set per outlet or the API returns "error in restaurant mapping".

BILLING

ORDERS + AIKO / BOOKENDS / CAPICHE OUTLETS

app_key	uvw0th4nksi97o1bgqp35zjxr6e2may8
app_secret	9450cbbbb22be056537e82138f1fa15220656e9b
access_token	9949a4aea79acad2e22e501e89c5ff3146f15e48
cookie	PETP00JA_API=mgnhpm6a8r5u11gatkpqhg7q00

INVENTORY

PURCHASE + TRANSFER FOR INVENTORY OUTLETS

app_key	rpvg7joamn421d3u0x5qhk9ze8sibtcw
app_secret	c7b1e4b80a2d1bfbf67da2bc81ca9dd9bf019b3e
access_token	7334c01be3a9677868cbf1402880340e79e1ea84

Orders API

Fetch daily sales orders. Uses T-1 logic: send today's date to receive yesterday's orders. Uses

BILLING

credentials.

GET https://api.petpooja.com/V1/thirdparty/generic_get_orders/

OUTLETS

OUTLET	RID	RESTID (SYNC CODE)	CREDENTIALS
Aiko (Ahmedabad)	134691	z2ogsrb0	BILLING
Aiko (Surat)	73492	1ce6t782	BILLING
Bookends mobile	359628	yvop12cq3m	BILLING
Capiche (Ahmedabad)	353369	qvy5ze7s0c	BILLING
Capiche (Piplod)	21492	ukrhzywj	BILLING
Capiche (Vesu)	344447	4tmaivhj	BILLING
Capiche Ahmedabad 2.0	419174	ihtnr4a7cy	BILLING

CURL EXAMPLE

```
curl --location --request GET \
'https://api.petpooja.com/V1/thirdparty/generic_get_orders/' \
--header 'Cookie: PETP00JA_API=mgnhpm6a8r5u11gatkpqhg7q00' \
--header 'Content-Type: application/json' \
--data '{
  "app_key": "uvw0th4nksi97o1bgqp35zjxr6e2may8",
  "app_secret": "9450cbbbb22be056537e82138f1fa15220656e9b",
  "access_token": "9949a4aea79acad2e22e501e89c5ff3146f15e48",
  "restID": "z2ogsrb0",
  "order_date": "2026-08-06",
  "refId": ""
}'
```

Purchase API

Fetch purchase records (invoices, item details, supplier info, GST). Supports date ranges up to 30 days. Inventory outlets use **INVENTORY** credentials; billing outlets use **BILLING**.

POST https://api.petpooja.com/V1/thirdparty/get_purchase/

CURL EXAMPLE — INVENTORY OUTLET

```
curl --location --request POST \  
  'https://api.petpooja.com/V1/thirdparty/get_purchase/' \  
  --header 'Content-Type: application/json' \  
  --data '{  
    "app_key": "rpvg7joamn421d3u0x5qhk9ze8sibtcw",  
    "app_secret": "c7b1e4b80a2d1bf67da2bc81ca9dd9bf019b3e",  
    "access_token": "7334c01be3a9677868cbf1402880340e79e1ea84",  
    "restID": "opw2xhc6vg",  
    "from_date": "01-08-2026",  
    "to_date": "06-08-2026",  
    "refId": ""  
  }'
```

CURL EXAMPLE — BILLING OUTLET

```
curl --location --request POST \  
  'https://api.petpooja.com/V1/thirdparty/get_purchase/' \  
  --header 'Content-Type: application/json' \  
  --data '{  
    "app_key": "uvw0th4nksi97o1bgqp35zjxr6e2may8",  
    "app_secret": "04150chhhb22ba056537a82138f1fa15220656a0b"
```

```
{
  "app_key": "7f30000022000000702100110022000000",
  "access_token": "9949a4aea79acad2e22e501e89c5ff3146f15e48",
  "restID": "z2ogsrb0",
  "from_date": "01-08-2026",
  "to_date": "06-08-2026",
  "refId": ""
}
```

Date fields: Use from_date / to_date, not start_date / end_date. The latter is silently rejected with "Please provide all request parameters" (code 100).

Inventory Transfer API

Fetch inventory transfer records between outlets — header, item details, source/destination outlet, transfer date and number. Uses `INVENTORY` credentials.

POST https://api.petpooja.com/V1/thirdparty/get_transfer/

DATE FORMAT	MAX RANGE	PAGE SIZE	PAGINATION
DD-MM-YYYY	30 days per call	50 records	refId = last transfer_id

OUTLETS

OUTLET	RID	RESTID (SYNC CODE)

"from_date": "01-08-2026",
"to_date": "06-08-2026",
"refId": ""
}'
```

Pagination & Date Windows

How to fetch complete datasets when results span multiple pages or months.

PAGINATION

- Each call returns a maximum of **50 records**.
- If you receive exactly 50, there are likely more. Take the last record's ID (`purchase_id` , `transfer_id` , or order ID) and pass it as `refId` in the next call.
- Repeat until the API returns fewer than 50 records or an empty array.
- Add a **400ms delay** between pages to avoid rate limiting.

DATE WINDOWS

- Purchase and Transfer APIs reject date ranges longer than **30 days** (error code 101).
- To fetch a longer period, split it into 30-day windows and concatenate the results.
- The Orders API works on a single-day basis (`order_date`), so loop one day at a time.

RESPONSE DATA FIELDS

PURCHASE RESPONSE

- Purchase header & number
- Item name, quantity, unit, rate, amount
- Supplier / vendor details
- Invoice number & date
- Tax: CGST, SGST, IGST, Cess
- Outlet details

TRANSFER RESPONSE

- Transfer header & number
- Transfer item details
- Source outlet
- Destination outlet
- Transfer date

Integration Notes

GOTCHAS

- The Orders API is a **GET with a request body**. The browser `fetch()` API refuses to send a body with GET requests — use a server-side proxy or a tool like curl/Postman.
- Petpooja's API servers do **not send CORS headers**. Browser-side JavaScript cannot call these endpoints directly; route through a backend proxy.

- Using the wrong credential set for an outlet returns: *"There were some error in restaurant mapping"*.
- Secrets and tokens are **40-character hex strings**. A dropped character produces "Invalid Token" (GN_102) — double-check lengths if you get that error.
- The API host for Purchase and Transfer is `api.petpooja.com` , not `inventory.petpooja.com` . The inventory host returns HTML 404s for these routes.

PENDING

- **Accounts Department** (RID 451175) — Menu Sharing Sync Code not yet received from Petpooja.
